

True Potential Allianz Cautious

Objective and Investment Policy

The Fund aims to achieve long term growth.

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The Fund will invest at least 85% of its assets on a permanent basis in the Allianz RiskMaster Conservative Multi Asset Fund (Master Fund), which is a sub-fund of Allianz International Investment Funds.

The Fund has been established as a UCITS feeder Fund. The Master Fund aims to provide investors with long term growth by maintaining a balance of assets that are considered lower to medium risk and those which are considered higher risk.

The Master Fund will invest directly or indirectly in:

- Shares (unit of ownership in a company)
- Bonds (issued by governments and other organisations)
- Other investment funds (including those with exposure to the property market)
- Cash, deposit, money market instruments (investments usually issued by banks or governments that are a short-term loan to the issuer by the buyer)

The Master Fund may also invest in: Derivatives (a financial instrument whose price is dependent upon or derived from one or more underlying assets), alternative asset classes (including commodities indices and hedge funds indices) - indirect exposure only.

The investment returns of the Fund are expected to be similar to the Master Fund. Differences in investment returns between the Fund and Master Fund may occur because the Fund may from time to time have more cash than the Master

Derivatives and forward transactions may not be used for investment purposes or for Efficient Portfolio Management (EPM) by the Fund directly but may be invested in by the Master Fund.

You can buy and sell shares on any working day in London, excluding UK public and bank holidays.

The Benchmark for this fund is IA Mixed Investment 20-60% Shares, this is a Comparator Benchmark. The benchmark may be used as a guide to compare and assess the performance of the Sub-Fund. Our aim is to help you monitor how your investment is performing. The Manager believes this is an appropriate comparator benchmark, given the multi-asset nature and relative risk profile of the Sub-Fund. The Sub-Fund does not use the benchmark as a target, nor is the Sub-Fund constrained by it. The mix of assets in the Sub-Fund may vary from those of the benchmark (and its constituents). Accordingly, it should be used for reference purposes only.

This fund may invest principally in collectives. Further information can be found in the True Potential OEIC 3 Prospectus available at www.truepotential.co.uk/documents/

Ongoing Charges Figure (OCF)*: 0.80%

There are no entry or exit charges.

Launch Date: 19 May 2016

Risk Profile: Cautious

The Cautious Investor may be sensitive to short-term losses. A Cautious Investor's potential aversion to losses could compel them to shift into a more stable investment if significant short-term losses occur. A Cautious Investor is usually willing to accept somewhat lower returns in order to lower their exposure to risk.

Why True Potential Allianz Cautious?

The True Potential Allianz Cautious Fund is sub-managed by Allianz Global Investors and invests in the Allianz RiskMaster Conservative Multi-Asset Fund.

The True Potential Allianz Cautious Fund provides a diversified fund designed to provide the opportunity for capital growth and income through diversified exposure, directly or indirectly, to global equity and fixed income markets.
