For full investment objectives and policy details please refer to the <b>Prospectus</b> .	<ul> <li>Investment Fund Risk - This Fund invests into other investment funds, they may invest in different assets, economic sectors, or countries (including emerging markets) and therefore have different risk profiles not in line with those of this Fund.</li> <li>Performance Risk - Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro-economic environment, certain investment types and styles may perform better than others and investment objectives may become more difficult to achieve.</li> <li>Emerging Market Risk - Investments in emerging markets may involve greater risks due to political and economic instability, and underdeveloped markets and systems.</li> <li>Counterparty Risk - There may be cases where the organisation from which we buy a derivative, or an asset, fails to meet its obligations. The Fund's cash deposits are also subject to counterparty risk.</li> <li>Derivative Risk - The Fund is entitled to use derivatives for EPM and investment purposes. Derivatives may not achieve their intended purpose. Their prices may move up or down significantly over relatively short periods of time which may result in losses greater than the amount paid.</li> <li>Operational Risk - The Fund faces non-market risk, relating to purchasing, holding and servicing the Fund's assets.</li> <li>Credit Risk - Where the Fund invests in bonds, there is a risk the bond issuer may fail to meet its repayments. Changes in interest rates, inflation and the creditworthiness of the bond issuer may also affect the bond's market value. This risk is particularly relevant where the fund invests in bonds with a lower credit rating.</li> <li>Exchange Rate Risk - Investment trusts and closed ended funds may borrow to purchase additional investments. This can increase returns when stock markets rise but will magnify losses when markets fall. The value of an investment trust or a closed-ended fund moves in line with stock market demand and i</li></ul>
