Key Investor Information

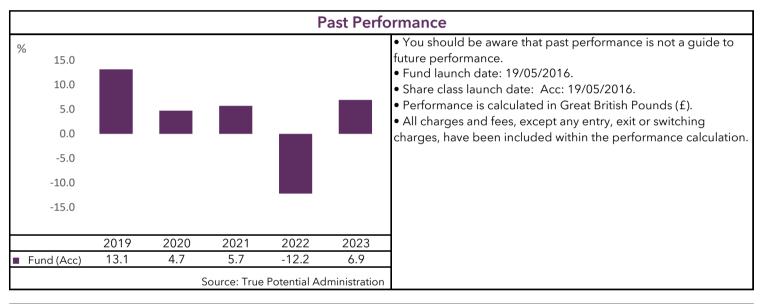

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

True Potential Allianz Cautious A Accumulation Shares ISIN: GB00BYNYXT64

The Fund is a Sub-Fund of True Potential OEIC 3. The Authorised Corporate Director of the Fund is True Potential Administration LLP, part of the True Potential LLP group.

Objectives and Investment policy	Risk and Reward profile						
The Fund aims to achieve long term growth. Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 5 years.	The Risk and Reward Indicator demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below						
The Fund will invest at least 85% of its assets on a permanent basis in the Allianz RiskMaster Conservative Multi Asset Fund (Master Fund), which is a sub-fund of Allianz International Investment Funds.	shows the Fund's ranking on the Risk and Reward Indicator. Typically lower rewards Lower risk Higher risk						
The Fund has been established as a UCITS feeder Fund. The Master Fund aims to provide investors with long term growth by maintaining a balance of assets that are considered lower to medium risk and those which are considered higher risk.		2	3	4	5	6	7
 The Master Fund will invest directly or indirectly in: Shares (unit of ownership in a company) Bonds (issued by governments and other organisations) Other investment funds (including those with exposure to the property market) Cash, deposit, money market instruments (investments usually issued by banks or governments that are a short-term loan to the issuer by the buyer) 	The Fund is in a medium category because the price of its investments have risen or fallen to some extent. The category shown is not guaranteed to remain unchanged and may shift over time. Even the lowest category does not mean a risk-free investment. The price of the Fund and any income from it can go down as well as up and is not guaranteed. Investors may not get back the amount invested. Past performance is not a guide to future performance. Investment Fund Risk - The Master Fund is permitted to invest into other investment funds, they may invest in different assets, economic sectors or countries (including emerging markets) and therefore have different risk profiles not in line with those of this Fund. Performance Risk - Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro-economic environment, certain investment types and styles may perform better than others and investment objectives may become more difficult to achieve. Counterparty Risk - There may be cases where the organisation from which we buy a derivative, or an asset, fails to meet its obligations. The Fund's cash deposits are also subject to counterparty risk.						
The Master Fund may also invest in: Derivatives (a financial instrument whose price is dependent upon or derived from one or more underlying assets), alternative asset classes (including commodities indices and hedge funds indices) - indirect exposure only.							
The investment returns of the Fund are expected to be similar to the Master Fund. Differences in investment returns between the Fund and Master Fund may occur because the Fund may from time to time have more cash than the Master.							
Accumulation Shares: Any income the Fund generates will be reinvested.	Derivative Risk - The Master Fund is entitled to invest use derivatives for EPM and investment purposes. Derivatives may not achieve their intended purpose. Their prices may move up or down significantly over relatively short periods of time which may result in losses greater than the amount paid. Operational Risk - The Fund faces non-market risk, relating to purchasing, holding and servicing the Fund's assets. Credit Risk - Where the Master Fund invests in bonds, there is a risk the bond						
Derivatives and forward transactions may not be used for investment purposes or for Efficient Portfolio Management (EPM) by the Fund directly but may be invested in by the Master Fund.							
You can buy and sell shares on any working day in London, excluding UK public and bank holidays.	issuer may fail to meet its repayments. Changes in interest rates, inflation and the creditworthiness of the bond issuer may also affect the bond's market value. This risk is particularly relevant where the fund invests in bonds with a
